**Inhalation:** Move to fresh air. Call a physician if symptoms develop or persist.

**Eye contact:** Rinse with water. Get medical attention if irritation develops and

persists.

**Ingestion:** Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

#### **4.2 Most important symptoms and effects, both acute and delayed**

See Section 11 for more detailed information on health effects and symptoms.

#### **4.3 Personal protection for first aid responders**

If exposed or concerned: Get medical advice/attention. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this Safety Data Sheet to the doctor in attendance.

## **5. FIRE FIGHTING MEASURES**

---

### **5.1 Specific hazards**

Highly flammable. May evolve toxic gases(Carbon oxide, hydrocarbons) when heated to decomposition. Vapor may explosive mixtures with air. Eliminate all ignition sources including cigarettes, open flames, spark producing switches/tools, heaters, naked lights, etc when handling.

### **5.2 Extinguishing media**

Water fog. Foam. Dry chemical power. Carbon dioxide(CO<sub>2</sub>). Prevent contamination of drains and waterways.

### **5.3 Special fire fighting procedures**

Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up.

### **5.4 Protection of fire-fighters**

Fire-fighters must be use standard protective equipment including flame retardant coat,

helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

---

## **6. ACCIDENTAL RELEASE MEASURES**

---

### **6.1 Personal precautions, protective equipment and emergency procedures**

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

### **6.2 Environmental precautions**

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

### **6.3 Clean-up methods and materials and containment measures**

Stop leak if you can do so without risk. Eliminate all ignition sources(no smoking, flares, sparks, or flames in immediate area). Keep combustibles(wood, paper, oil, etc.)away from spilled material. This product is miscible in water. Prevent product from entering drains. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material(e.g. cloth, fleece).Clean surface thoroughly to remove residual contamination. Put material in suitable, covered, labeled containers. For waste disposal, see section 13 of the SDS.

---

## **7. HANDLING AND STORAGE**

---

### **7.1 Handling**

Obtain special instruction before use. Do not handle until all safety precautions have

been read and understood. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. Avoid contact with eyes. Avoid prolonged exposure. When using, do not eat, drink or smoke. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Avoid release to the environment. Wash contaminated clothing before reuse. Observe good industrial hygiene practices.

## **7.2 Storage**

Keep containers tightly closed. Keep containers in a dry, cool, and well-ventilated place. Keep away from heat/spark/open flames/hot surfaces. Store away from incompatible materials(see section 10 of the SDS).

---

## **8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

---

### **8.1 Control parameters**

#### **Exposure limits**

No occupational exposure limit values exist for any of the components listed in Section 3 of this Safety Data Sheet.

#### **Biological limit value**

No biological exposure limits noted for the ingredients.

#### **Monitoring methods**

Follow standard monitoring procedures.

### **8.2 Engineering measures**

Good general ventilation(typically 10 air changes per hour)should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels to an acceptable level.

### **8.3 Respiratory protection**

If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with an organic vapor cartridge. Use a self-contained breathing apparatus in confined spaces and for emergencies.

#### 8.4 Eye protection

Wear safety glasses with side shields(or goggles).

#### 8.5 Hygiene measures

Observe any medical surveillance requirements. When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
